RE: DONALDSON EXPERIMENT

DATE: JANUARY 14, 1954

Attached is copy of a telegram from J. R. Turan, Santa Fe Operations Office Contract and Procurement Branch, to the Fisher Scientific Company, St. Louis, Missouri, with respect to the undelivered portion of Contract AT(29-2)-201.

In light of the phraseology of this telegram, please report to me in the usual form immediately upon receipt of this material at Pacific Ports Industries for packaging in order that I may in turn advise Mr. Turan of its arrival.

Upon receipt of this memo, please advise me immediately of any undelivered contract, purchase order or material transfer against which delivery has not been completed showing thereon the contract or purchase order number, together with item number and quantity remaining open.

I signed an authorization today to ship the remaining items for the Donaldson Experiment by air since the only other transportation we will have between now and late February will be the February reefer, and it is doubtful if this will arrive at jobsite in sufficient time for these people to unpack and set up their equipment for whatever use it is intended.
